- Bundled

A diagram illustrating the equilibrium between a racemic mixture and a chiral environment. On the left, a purple circle labeled 'Rac' is shown with an arrow labeled k_{on} pointing towards a vertical line representing a chiral environment. On the right, a purple circle labeled 'Rac' is shown with an arrow labeled k_{off} pointing away from a similar vertical line. The entire diagram is enclosed in an orange border.

A diagram showing two yellow hexagons, each labeled 'Rho'. The left hexagon has an arrow pointing left away from it labeled k_{off} . The right hexagon has an arrow pointing right towards it labeled k_{on} . A curved line separates the two hexagons, representing a transition between the two states.

The image shows two stylized suns, each with a clock face in the center. The suns are composed of jagged, wavy lines in yellow and purple. The top sun's clock face shows a time around 10:10, while the bottom sun's clock face shows a time around 1:50.
