

- Rac
- Branched
- Rho
- Bundled

A diagram showing two purple circles representing states. The left circle is labeled 'Rac' and has an arrow pointing right to the right circle, labeled k_{on} . The right circle is labeled 'Rac*' and has an arrow pointing left to the left circle, labeled k_{off} . The circles are connected by a double-headed arrow, indicating a reversible process.

A diagram showing two yellow hexagons. The left hexagon is labeled 'Rho' and the right hexagon is labeled 'Rho-bar' (represented by a hexagon with a horizontal line through it). A curved arrow points from the 'Rho' state to the 'Rho-bar' state, labeled with k_{on} . Another curved arrow points from the 'Rho-bar' state back to the 'Rho' state, labeled with k_{off} .
